

G300

Le Maitre's flagship smoke machine

The G300, Le Maitre's flagship smoke machine is rugged, versatile, and has very high output. A dual-mode machine, it combines an incredibly high powered smoke generator with a water based hazer and is the most technologically advanced dual purpose machine available.

Along with its powerful continuous output, the patented Genesis easy change heater block system, standard or DMX remote and microprocessor system management, the G300 can also be linked to Le Maitre's Freezefog LSG units to produce a spectacular low fog effect.

Designed to perform in the most demanding of applications, the G300 is the machine of choice among touring, rental, theme park, and cruise ship customers as well as the emergency services and military.
